SOIL EROSION AND SEDIMENTATION CONTROL PERMITS APPLICATION INFORMATION AND INSTRUCTIONS

Attached is the application form for a Soil Erosion and Sedimentation Control permit. A permit is needed if the earth change:

1. disturbs more than one acre of land or
2. is within 500 feet of a lake or stream, including open county drains and water bodies over one acre of surface area or
3. is a parcel in a subdivision or development that was permitted after May 29, 2003, when that parcel changes ownership or type of earth change activity

Please review the form before filling in the required information. The entire form must be completed before submitting for processing.

Item 2 – refers to the location of the earth change or project

Item 3 – briefly describes the earth change; size includes the entire area disturbed, i.e. cut, fill, stockpile, etc.

Item 5 – be sure to list the responsible individual actually “on site”, along with the other information

Additional information and items to include with application:

1. One set of Soil Erosion and Sedimentation Control plans for engineered projects, or if required by the County Enforcing Agency
2. Site plan with additional information listed on page 2, or a soil erosion schedule for subdivision lots as detailed on page 4 & 5, for non-engineered projects.
3. Proof of ownership, included with legal description
4. Check for appropriate fees, payable to **SAGINAW COUNTY PUBLIC WORKS COMMISSIONER** based on the following schedule:

Residential Permit 12 Months <input type="checkbox"/>	Fee (Round up to the nearest ¼ acre)
Minor Permit (Less than 1 acre)	\$300.00
Major Permit (1 or more acres)	\$300.00 + \$150 per acre over one
Residential Permit 18 Months <input type="checkbox"/>	
Minor Permit (Less than 1 acre)	\$400.00
Major Permit (1 or more acres)	\$400.00 + \$150 per acre over one
Industrial/Commercial Permit	
Minor Permit (Less than 1 acre)	\$500.00
Major Permit (1 or more acres)	\$500.00 + \$200 per acre over one
Mining Operation Permit * <input type="checkbox"/>	
Minor Permit (Less than 2 acres)	\$500.00
Major Permit (2 or more acres)	\$500.00 + \$50 per acre over two
Utility Permit	
Minor Permit (Less than 1 mile)	\$400.00
Major Permit (1 or more miles)	\$400.00 + \$50 per mile over one
Annual Renewal of Existing Permit	Fee
Mining Permit	\$300.00
All other renewals	Same as initial fee

*During the period of **January 1 - March 31** only 18 Month Residential Permits will be issued in lieu of 12 Month Residential Permits.

**Mining operation includes all excavations for the purposes of removing and/or selling materials including the construction of ponds and/or lakes.

**ITEMS TO BE INCLUDED IN THE SOIL EROSION AND SEDIMENTATION
CONTROL PLAN**

1. A scaled drawing of the project, not more than 200 feet to the inch. For many projects this can be a non-engineered plan.
2. A legal description of the property, from the deed or tax statement.
3. Site location sketch or map, including property boundaries.
4. Proximity to lakes and streams, including open county drains.
5. The predominant land features and vegetation.
6. Contour intervals or slope description.
7. Description of soil types.
8. Show the boundaries or limits of the earth change(s). Includes excavation, fill stockpiling, grading.
9. Drainage patterns, where water leaves the site.
10. Timing and sequence of the earth changes. (Sample construction schedule available)
11. Description and location of the temporary and permanent erosion control measures.
12. How are the erosion control measures maintained and by whom?

A worksheet and sample plan that shows how most of the items are included on a single sheet is included in this packet.

Complete applications, supplemental information and fees should be mailed to:

SAGINAW COUNTY PUBLIC WORKS COMMISSIONER
111 S Michigan Ave
Saginaw, MI 48602

Projects started without a permit are in violation of the law and subject to double fees.

6/17 - 9/10 - CONSTRUCTION OF HOME

9/15 - PAVE DRIVEWAY

9/15 - 9/20 - FINAL GRADE, SEED AND MULCH

REMOVE PERIMETER CONTROLS

VEGETATION IS ESTABLISHED

**Soil Erosion and Sedimentation Control Requirements
For Subdivision House Construction**

1. Disturb the minimum area necessary for construction. Leave the maximum amount of vegetation undisturbed along curb and rear lot inlets.

2. Keep soil from eroding off the site by either:
 - a) maintaining a 20-ft buffer zone of mature vegetation along curb in flat areas, **or**
 - b) trenching in silt fence along the curb, **or**
 - c) Constructing and maintaining a sediment containment swale behind the curb.
 - i. If soil is put into the swale or buffer zone during construction, install trenched-in silt fence around the soil.

3. Protect the driveway from eroding into the street by either:
 - a) Installing a stone aggregate driveway immediately after backfilling basement or crawl space, **or**
 - b) Paving the driveway immediately after backfilling basement or crawl space.
 - i. Care should be taken to limit access to the aggregate or paved driveway.
 - ii. Park all vehicles on the street or on the aggregate/paved driveway; do not park any vehicles on bare soil.

4. Protect storm water inlets as follows:
 - a) Rear lot inlets: Install and maintain filter fabric or bag. Replace when covered with sediment. Make sure fabric covers the entire opening.
 - b) Street inlets: Install inlet protection and maintain on a regular basis to ensure proper drainage.

5. Any sediment or other material which gets into the street must be removed daily.

6. Landscaping: Apply top-soil, seed and mulch as soon as construction traffic in yard allows. The contractor must set a date by which seeding is to be completed.
 - a) If soil is seeded too late in the year for the yard to fill in with grass, install either:
 - i. A strip of mulch blanket along the curb and sidewalk, and enough mulch over the rest of the yard to prevent erosion rills, or
 - ii. Trenched-in silt fence along the curb and sidewalk. Leave silt fence in place until grass is established.

SOIL EROSION SCHEDULE; to be completed by developer or contractor. Fill in the blanks with an approximate date for each activity or with a schedule, i.e. Start within X days, weeks 1, 2, 3 etc.

1. Remove topsoil _____
2. Construct sediment swales _____ **or**
Install trenched-in silt fence along curb _____
3. Construct and backfill basement/crawl space _____
4. Install aggregate stone driveway _____
5. Pave driveway _____
6. Seed and mulch yard _____
7. Install winter yard protection: Silt fence _____ **or**

Mulch blanket _____

For areas with public traffic, what measures will be used in street inlets to catch sediment without flooding streets?

How will sediment be removed daily from street? _____

Return this form to the Saginaw County Public Works Department as a portion of your Soil Erosion and Sedimentation Control Plan.
